Yu-Chia (Yuga) Chen

Product Design / UX Lead

yuga.chen@gmail.com | Taiwan

PROFESSIONAL SUMMARY

Product designer and solo founder translating complex client requirements into usable products, operational tools and brand experiences. Combines UX design, product thinking and AI-assisted delivery, with earlier experience at BenQ across B2B platforms, e-commerce and connected devices. Founded 嘉思特有限公司 in February 2026, generating NT$2.7 million in company revenue in 2026 to date.

CORE SKILLS

User research | Usability testing | Interaction design | Information architecture | Product workflows | Design sprint facilitation | Brand identity | AI-assisted delivery | Figma | Sketch | Webflow

PROFESSIONAL EXPERIENCE

Founder & Independent Product Consultant

Independent practice / 嘉思特有限公司

Independent practice: Aug 2024 - Present
Company: Feb 2026 - Present

- Owned client discovery, scoping, design and delivery. Founded the company in February 2026 and generated NT$2.7 million in 2026 company revenue to date, with an average project value of approximately NT$120,000.
- Combined design and AI-assisted production to deliver client projects in three days to one week, with stable handovers, low maintenance overhead and client referrals.
- Completed a ten-brand design engagement within one week; the work passed design-review evaluation. Created two gift-box packaging designs and an educational nonprofit exhibition spanning key visuals, website and on-site design.
- Designed brand websites for metalworking, silicone manufacturing, Chinese medicine and Japanese-language education; established 嘉思特有限公司 in February 2026.

AI Product Development (Part-time)

孔雀魚數位科技

Jun 2025 - Sep 2026

- Contributed to product-development discussions and built AI-enabled workflows for ESG reporting, project-results presentation, team matching, meeting transcription and presentations.
- Worked with the team on e-commerce and iOS/Android communication and collaboration tools in a part-time capacity.

Technical Product Manager

Seasalt.ai

Feb 2024 - Aug 2024

- Translated B2B customer needs into UX flows and PRDs, coordinating development with cross-national teams for an AI chat-agent product.
- Delivered 25+ features and bug fixes in three months through five-day iteration cycles; conducted customer interviews to inform product direction.

PROFESSIONAL EXPERIENCE - CONTINUED

Business Management / Product Management

BenQ

Product Manager: Dec 2021 - Feb 2024
Business Manager Head: May 2023 - Feb 2024

- Led ideaCam product development and international launch planning, bringing the product to eight countries within ten months.
- Led the BenQ EnSpire experience across Mac, Windows and web, defining UI flows and coordinating product development from concept to launch.
- Built and led an agile marketing team, extending product-design work into launch execution and commercial operations.

Senior UX Designer

BenQ

Aug 2019 - Dec 2021

- Used interviews and usability testing to develop X-Sign design tools and the Data Link no-code experience; collaborated with Pantone on a digital-signage design tool.
- Designed global B2B e-commerce and an online user-manual system that increased organic traffic 25-fold in six months.

EARLIER EXPERIENCE

Founder | YS Design Studio

Jan 2018 - Mar 2020

Founded a product, service and brand design consultancy; developed 3+ products through government collaborations and proposed services for Amsalp and Rikulau.

Researcher & Project Leader | NCKU Wish-Making Lab

Sep 2016 - Apr 2018

Conducted design research, prototyping and usability testing on projects including ITRI OLED and GEOSAT drone development.

SELECTED PROJECTS & VENTURES

- Court Match: designed a mobile sports-booking and player-matching concept, connecting court discovery, time selection and booking confirmation.
