Yu-Chia (Yuga) Chen

AI / Senior Product Manager

yuga.chen@gmail.com | Taiwan

PROFESSIONAL SUMMARY

Product manager and solo founder connecting customer discovery, product design, AI-assisted development and commercial delivery. Founded 嘉思特有限公司 in February 2026 and generated NT$2.7 million in company revenue in 2026 to date, primarily through B2B work with an average project value of NT$120,000. Experienced in enterprise workflows, AI products and international product launches.

CORE SKILLS

Product strategy | Requirements synthesis | Customer discovery | Product roadmaps | AI-assisted development | Agile delivery | Cross-functional collaboration | Go-to-market | UX design

PROFESSIONAL EXPERIENCE

Founder & Independent Product Consultant

Independent practice / 嘉思特有限公司

Independent practice: Aug 2024 - Present
Company: Feb 2026 - Present

- Owned requirements synthesis, scoping, sales, implementation and handover. Following company formation in February 2026, generated NT$2.7 million in 2026 company revenue to date; average project value was approximately NT$120,000.
- Used AI-assisted workflows to deliver client projects in three days to one week, maintaining stable delivery, low maintenance overhead and client referrals.
- Delivered an energy management system adopted by a school to manage 200+ devices; developed solutions for construction operations, space management, electrical-material quotations and delivery dispatch.
- Established 嘉思特有限公司 in February 2026, formalizing the independently operated business begun in August 2024.

AI Product Development (Part-time)

孔雀魚數位科技

Jun 2025 - Sep 2026

- Contributed to team product-development discussions and built AI tools for ESG reporting, project-results presentation, team matching, meeting transcription and presentation creation.
- Worked on e-commerce and iOS/Android communication and collaboration tools alongside the team in a part-time capacity.

Technical Product Manager

Seasalt.ai

Feb 2024 - Aug 2024

- Translated B2B customer needs into UX flows and PRDs, coordinating development with cross-national teams for an AI chat-agent product.
- Delivered 25+ features and bug fixes in three months through five-day iteration cycles; conducted customer interviews to inform product direction.

PROFESSIONAL EXPERIENCE - CONTINUED

Business Management / Product Management

BenQ

Product Manager: Dec 2021 - Feb 2024
Business Manager Head: May 2023 - Feb 2024

- Led ideaCam product development and go-to-market planning, launching in eight countries within ten months.
- Built and led an agile marketing team that reached US$150,000 in monthly revenue with over 70% month-over-month growth; reduced Amazon advertising cost of sales (ACOS) from 60% to 13%.
- Led ideaCam and BenQ EnSpire from concept to launch, defining specifications, coordinating manufacturing and software teams, and conducting market and usability tests.

Senior UX Designer

BenQ

Aug 2019 - Dec 2021

- Designed B2B content-management and global e-commerce experiences using interviews, customer data and usability testing.
- Developed X-Sign design tools and an online user-manual system that increased organic traffic 25-fold in six months.

EARLIER EXPERIENCE

Founder | YS Design Studio

Jan 2018 - Mar 2020

Founded a product, service and brand design consultancy; developed 3+ products through government collaborations and proposed services for Amsalp and Rikulau.

Researcher & Project Leader | NCKU Wish-Making Lab

Sep 2016 - Apr 2018

Conducted design research, prototyping and usability testing on projects including ITRI OLED and GEOSAT drone development.

SELECTED PROJECTS & VENTURES

- Disaster preparedness (2025): built an app for audiences across multiple countries; related content exceeded 150,000 impressions in one day. Generated NT$720,000 in disaster-supply sales in one month, plus a separate NT$320,000 through collaborations with two vendors.
- JISTO content platform: built a Notion-backed publishing workflow with server-rendered HTML, Markdown and read-only APIs for consistent access by visitors, search crawlers and AI agents.
